

### Respirators, dust, mists and metal fumes, 8000 series

Dusts, mists and metal fumes are the most common respiratory hazards in the working environment as by-products of processes such as grinding and mixing. 3M respirators provide comfortable, maintenance free protection against these particular hazards.

Catalogue No	Legacy No	Description	Pack qty
12382389	-	8710E dust respirator, provides comfortable, effective respiratory protection against fine dust; the convex shape, twin strap design and nose clip ensure a good fit over a wide range of face sizes. EN 149: 2001 FFP1 Particulates Assigned Protection Factor: 4 (NPF 4)	20

12392389	-	8810 dust/mist respirator, provides comfortable, effective respiratory protection against fine dusts and water based mists; the convex shape, twin strap design and nose clip ensure a good fit over a wide range of face sizes. EN 149: 2001 FFP2 Particulates Assigned Protection Factor: 10 (NPF 12)	20

Catalogue No	Legacy No	Description	Pack qty
12302399	-	8812 valved dust respirator, provides comfortable, effective respiratory protection against fine dust; the convex shape and exhalation valve reduce heat build up to provide comfortable protection particularly in hot and humid conditions. EN 149: 2001 FFP1 Particulates Assigned Protection Factor: 4 (NPF 4)	10

Catalogue No	Legacy No	Description	Pack qty
10096691	-	8822 valved dust/mist respirator, provides comfortable, effective respiratory protection against fine dusts and water based mists; the convex shape and exhalation valve reduce heat build up to provide comfortable protection particularly in hot and humid conditions. EN 149:2001 FFP2 Particulates Assigned Protection Factor: 10 (NPF 12)	10

Catalogue No	Legacy No	Description	Pack qty
12342399	-	8835 dust/mist/metal fume respirator, provides comfortable, effective respiratory protection against fine dusts, oil and water based mists and metal fumes; the exhalation valve, soft sealing ring and adjustable straps ensure a comfortable, properly sealed fit. EN 149: FFP3D Particulates Assigned Protection Factor: 20 (NPF 50)	5

### Respirators, single use

Unique double shell design ensures maximum comfort and optimum shape retention over long periods. Light and comfortable, the soft, adjustable strap ensures a perfect fit for every face shape. Complies with EN 149 (see Respiratory Legislation, page 1279).
