

Dialysis membrane device, Spectro/Por® Float-A-Lyzer® G2, Spectrum

SPECTRUM®

NEW

LB

- 95% to 98% sample recovery
- Highest membrane purity
- Superior handling and leak protection
- Volume specific dilution control
- Ideal for gel Electro-elution
- Simply rinse with water, load sample with pipette and dialyse

Spectrum introduces the next generation (G2) in ready to use laboratory dialysis devices featuring Ultra-pure Biotech Cellulose Ester (CE) membrane.

The leak-proof screw-on cap with sealing o-ring provides easy access with included pipette for loading, in-process testing and sample retrieval, without the risk of needle punctures. The included flotation ring improves sample buoyancy and vertical orientation during dialysis. The sleek design allows multiple samples to be dialysed in the same reservoir. No additional kits, buoys or accessories are required. The Float-A-Lyzer G2 is packaged dry and ready-to-go with all components included.

Sample recovery, purity and dilution control:

Proprietary Biotech Grade CE is a low protein binding synthetic membrane available in six precise MWCOs with no heavy metal and sulfide contaminants. The cylindrical tubing geometry prevents sample dilution (associated with cassette-type devices) and provides open access for total volume retrieval. Only the Float-A-Lyzer G2 assures a 95% to 98% sample recovery while maintaining 99% sample purity and 1% sample dilution.

1mL maximum sample volume

Catalogue No	Alt. No	MWCO, kDa	Colour	Pack qty
BIO-197-170C	G235025	0.1 to 0.5	Green	12
